

ENTERPRISE VOICE TELEMETRY & PRODUCT GROWTH

Turn 15 Seconds of Spoken Customer Frustration into Instant Product Growth

SayPulse replaces outdated text forms with an unboxed, futuristic voice widget. Using Google Gemini 3.6 Flash AI, it synthesizes spoken feedback, extracts actionable engineering tickets, and captures full technical diagnostics in real time.

✗ The Problem with Traditional Text Feedback

- **98% Form Abandonment:** Typing long feedback on mobile is painful and tedious.
- **Vague & Low Context:** Users write 2 words ("*checkout broken*") with zero repro steps.
- **No Technical Diagnostic:** Missing browser errors, route path history, or viewport specs.
- **Ignored in Cluttered Inboxes:** Takes days for PMs to triage and convert into Jira tickets.

✦ The SayPulse AI Voice Breakthrough

- **7x Faster Than Typing:** Users tap, speak for 10 seconds naturally, and submit instantly.
- **Gemini 3.6 AI Synthesis:** Auto-generates executive summaries and concrete bug tasks.
- **Automatic Technical Harvest:** Auto-attaches console errors, route history & device metadata.
- **Instant Engineering Alerts:** Dispatches high-fidelity HTML email alerts for 1-2★ critical bugs.

PROPRIETARY END-TO-END PIPELINE

How SayPulse Converts Voice into Engineering Velocity

From the moment a customer taps the microphone to the dispatch of an executive alert.

1 Spoken Voice Capture

Customer speaks freely into the floating widget. Choose from **6 unboxed visualizer animations** (Siri Wave, Neural Sphere, Particle Ring, etc.).

🔒 Client-side audio processing with PII redaction

2 Gemini 3.6 Flash AI Engine

Our server-side LLM pipeline instantly parses the transcript, detects sentiment, classifies the issue category, and formulates an actionable engineering task.

⚡ Sub-second response with tone rewriting

3 Telemetry & Alert Dispatch

Auto-harvests route history, browser errors, viewport specs, and dispatches rich HTML alerts to engineering and product teams.

✉️ Instant Email Cards + MHC WhatsApp Gateway

LIVE DATA TRANSFORMATION SHOWCASE

🎙️ Raw Spoken Audio (What the customer said):

"Hey, the checkout button is totally unresponsive on mobile Safari and I can't apply my discount coupon code."

🌟 Gemini AI Structured Output (What your team receives):

Summary: Checkout button fails on iOS Safari; coupon validation blocked.

Category: Bug (Critical) | CSAT: 1/5 ⭐

Actionable Task: Fix touch listener on Checkout submit trigger and resolve coupon API timeout.

📍 **Route Journey:** /products → /cart → /checkout

📱 **Client:** Mobile Safari • iOS 17.5 • 393x852

⚠️ **Console Error:** TypeError: Cannot read properties of undefined

🎨 6 Unboxed Futuristic Visualizers

🌊 **Siri Wave:** Fluid holographic sine waves

🌌 **Neural Sphere:** 3D breathing particle cluster

💫 **Particle Ring:** Orbiting quantum dust halo

☁️ **Nebula Plasma:** Ethereal cosmic gas cloud

🌀 **Solar Ribbon:** Golden helical energy coil

⚡ **Laser Horizon:** Dual neon equalizer beams

BUSINESS INTELLIGENCE & GOVERNANCE

Isolated Workspaces, Master Superadmin & Real-Time Alerts

Empowering product leaders, engineering heads, and executives with instant intelligence.

Executive Intelligence Portal

- **Live CSAT & Sentiment Trends:** Track positive, frustrated, and critical customer pulses in real time.
- **Top Friction Leaderboard:** Automatically surfaces the exact URL routes where users struggle most.
- **Category Distribution:** Instant AI breakdown across Bugs, UX Friction, Feature Requests, and Performance.
- **Interactive Slide-Over Drilldown:** Inspect audio transcripts, console logs, and 4 AI tone rewrites.

Enterprise Multi-Tenancy & Slugs

- **Dedicated Tenant URLs:** Each client gets their own isolated workspace (/admin/swiggy, /admin/stripe).
- **100% Data Isolation:** Zero data leakage between accounts with scoped API keys.
- **🔥 Superadmin Master Center:** Platform owners get a holistic cockpit to monitor all registered companies.
- **Zero-Friction Onboarding:** 10-second setup popup to provision fresh workspaces for new signups.

TRANSACTIONAL ALERTS & PASSWORDLESS WHATSAPP OTP

High-Fidelity Email Alert Engine

Dispatches instant HTML cards to `alerts@yourcompany.com` when a 1-Star rating or critical bug occurs, complete with Gemini summaries and 1-click dashboard resolution links.

MHC WhatsApp Gateway (Login OTP)

Passwordless, frictionless sign-in via WhatsApp 6-digit OTP codes with 10-minute expiry and anti-brute force security.

⚡ Zero-Build 1-Line Script Integration

Embed on any plain HTML, React, Next.js, Shopify, WordPress, or Webflow site in 30 seconds.

```
←!— Embed SayPulse Voice Widget with Shadow DOM isolation —→  
<script src="https://cdn.saypulse.ai/v1/saypulse.min.js"  
  data-key="sp_live_acme_corp_8942"  
  data-animation="siri-wave"  
  data-position="bottom-right"  
  defer></script>
```

HIGH-IMPACT ROI & ENTERPRISE TIERS

Measurable Business Impact & Commercial Plans

Simple, transparent pricing designed to scale with your user volume.

STARTER

\$49 / month

- Up to 500 Voice Notes / mo
- Gemini 3.6 Flash AI Summaries
- 1 Workspace & 1 Live API Key
- Standard Email Alerts
- All 6 Wave Visualizers

GROWTH (POPULAR)

RECOMMENDED

\$149 / month

- Up to 3,000 Voice Notes / mo
- Advanced Telemetry & Console Logs
- WhatsApp Login OTP Integration
- Unlimited Team Admin Seats
- Custom Brand Colors & Styling
- Priority Email & Webhook Support

ENTERPRISE

Custom / annual

- Unlimited Voice Note Ingestion
- Custom LLM Fine-Tuning & Prompts
- Dedicated Database & Regional SLA
- Jira / Slack / Linear Direct Sync
- Custom Domain White-Labeling
- 24/7 Dedicated Account Manager

The Business Return on Investment (ROI)

A typical digital product captures only **0.5%** of unhappy user experiences before they churn silently. With SayPulse, feedback capture rates jump to **4.2%**. Fixing a single high-friction checkout bug detected by voice telemetry can save tens of thousands of dollars in lost monthly ARR.
